Storage: S3, EBS
Security: IAM, Security Groups, CloudWatch
Database Management: RDS, DynamoDB
Front End Technologies — HTML CSS JavaScript & BOOTSTRAP
Backend Languages — Python | SQL | Django
Databases — MySQL
DevOps Tools — Version Control: Git, GitHub

PROJECTS

GYM Management System

- In previous time gym members were used to take admissions in gym and had an receipt of the package But i had design such a project which can lead gym members to add a gym package to their profile and save their data for admission and aer it expires they can renew it by Gym Owner or Trainer

- This Project is build on a Django Rest Framework

- It is highly efficient for gym member and for Gym.Due to this project the data of gym members are saved for further process

Personal Portfolio (https://hrushikeshportfolio.netlify.app/)

- This is my Personal Portfolio this project build on Web development (HTML,CSS,JAVASCRIPT

- I have Deployed this Project on my Github and Netlify

INTERESTS

- Creating App Clones
- Cricket
